Biotechnology and Bioengineering

Volume 28, 1986

January 1986

Effects of Solute Hydrophobicity and Phospholipid Composition on Permeability of Composite Membranes Containing Phospholipids
E. Sada, S. Katoh, M. Terashima, S. Yamana, N. Ueyama, and M. Nagaya ... 1

Performance Evaluation of an Anoxic/Oxic Activated Sludge System: Effects of Mean Cell Residence Time and Anoxic Hydraulic Retention Time
W. K. Shieh and C. Y. Chen ... 7

Monitoring of Protein Product Formation during Fermentation with Fast Protein Liquid Chromatography
J.-G. Gustafsson, A.-K. Frej, and P. Hedman ... 16

Biosorption of Uranium and Lead by *Streptomyces longwoodensis*
N. Friis and P. Myers-Keith ... 21

Role of Water Activity in Ethanol Fermentations
R. P. Jones and P. F. Greenfield ... 29

The Production of Cellulase in a Spouted Bed Fermentor Using Cells Immobilized in Biomass Support Particles
C. Webb, H. Fukuda, and B. Atkinson ... 41

Immobilization of BSA, Enzymes and Cells of *Bacillus stearothermophilus* onto Cellulose, Polygalacturonic Acid and Starch Based Graft Copolymers Containing Maleic Anhydride
C. G. Beddows, M. H. Gil, and J. T. Guthrie ... 51

Urokinase Bound to Fibrocollagenous Tubes: An *In Vitro* Kinetic Study
F. F. Senatore and F. R. Bernath ... 58

Parameters Affecting Optimum Activity and Stability of Urokinase-Bound Fibrocollagenous Tubes
F. Senatore and F. Bernath ... 64

Effects of Immobilization on Growth, Fermentation Properties, and Macromolecular Composition of *Saccharomyces cerevisiae* Attached to Gelatin
P. M. Doran and J. E. Bailey ... 73

Membrane Separation of Protein Precipitates: Unstirred Batch Studies
N. Devereux, M. Hoare, and P. Dunnill ... 88

Communications to the Editor

Preparation and Properties of Stable Water-Insoluble Derivatives of Glutathione *S*-Aryltransferase
H. Ito, A. Shimizu, and I. Ichikizaki ... 97

Iron Availability in Mixed Cultures of Sulfate-Reducing Bacteria
J. Y. Hauser and G. A. Holder ... 101

A Method for the Determinations of the Activity and Optimal pH of Glucose Oxidase in an Unbuffered Solution
T.-L. Chen and H.-S. Weng ... 107

The Polymeric *p*- and *o*-Quinones as the Reactive Supports for the Enzymes Immobilization
J. Kučera ... 110

Biomass Yields and Energetic Yields of Oleaginous Yeasts in Batch Culture
J. G. Pan and J. S. Rhee 112

Simultaneous Saccharification/Fermentation with *Zymomonas mobilis*
D. J. Spangler and G. H. Emert 115

An Automatic and Sterilizable Sampler for Laboratory Fermentors: Application to the On-Line Control of Glucose Concentration
M. Ghoul, E. Ronat, and J.-M. Engasser 119

Use of Surface Aerator to Improve Oxygen Transfer in Cell Culture
W. S. Hu, J. Meier, and D. I. C. Wang 122

A Novel Acid Addition System for the Low-Pressure Reaction Bomb
M. E. Himmel 126

Release of Cellulases from *Penicillium janthinellum*
M. Rao, C. Mishra, S. Gaikwad, and M. C. Srinivasan 129

Recovery of β-Galactosidase by Adsorption from Unclarified *Escherichia coli* Homogenate
A.-K. Frej, J.-G. Gustafsson, and P. Hedman 133

Acid Hydrolysis of Jerusalem Artichoke for Ethanol Fermentation
K. Kim and M. K. Hamdy 138

Phenanthrene Degradation by *Beijerinckia* sp. B8/36
G. W. Strandberg, T. J. Abraham, Jr., and G. C. Frazier 142

Transient Responses of Continuously Growing Yeast Cultures to Dilution Rate Shifts: A Sensitive Means to Analyze Biology and the Performance of Equipment
L. Kätterer, H. Allemann, O. Käppeli, and A. Fiechter 146

February 1986

Maltodextrin Hydrolysis in a Fluidized-Bed Immobilized Enzyme Reactor
I. Vallat, P. Monsan, and J. P. Riba 151

The Acetone Butanol Fermentation on Glucose and Xylose. I. Regulation and Kinetics in Batch Cultures
O. Fond, J.-M. Engasser, G. Matta-El-Amouri, and H. Petitdemange 160

The Acetone Butanol Fermentation on Glucose and Xylose. II. Regulation and Kinetics in Fed Batch Cultures
O. Fond, J.-M. Engasser, C. Matta-El-Amouri, and H. Petitdemange 167

The Release of Fermentable Carbohydrate from Peat by Steam Explosion and its Use in the Microbial Production of Solvents
C. W. Forsberg, H. E. Schellhorn, L. N. Gibbins, F. Maine, and E. Mason 176

Analysis of Protein and Cell Volume Distribution in Glucose-Limited Continuous Cultures of Budding Yeast
B. M. Ranzi, C. Compagno, and E. Martegani 185

High Algal Production Rates Achieved in a Shallow Outdoor Flume
E. A. Laws, S. Taguchi, J. Hirata, and L. Pang 191

Immobilization of Enzyme onto Poly(ethylene–Vinyl Alcohol) Membrane
K. Imai, T. Shiomi, K. Uchida, and M. Miya 198

Effect of Amino Acid Supplement on Cell Yield and Gene Product in *Escherichia coli* Harboring Plasmid
S. Mizutani, H. Mori, S. Shimizu, K. Sakaguchi, and T. Kobayashi 204

Stability of Alginate-Immobilized Algal Cells
A. L. Dainty, K. H. Goulding, P. K. Robinson, I. Simpkins, and M. D. Trevan . 210

Application of Immobilized Heparins for Isolation of Human Antithrombin III
G. Mitra, E. Hall, and I. Mitra 217

Oxygen Supply to Immobilized Cells: 5. Theoretical Calculations and Experimental Data for the Oxidation of Glycerol by Immobilized *Gluconobacter oxydans* Cells with Oxygen or *p*-Benzoquinone as Electron Acceptor
P. Adlercreutz 223

Coupling of Concanavalin A to Cellulose Hollow Fibers for Use in Glucose Affinity Sensor
K. R. Srinivasan, S. Mansouri, and J. S. Schultz 233

Methane Recovery from Water Hyacinth through Anaerobic Activated Sludge Process
N. Saraswat and P. Khanna 240

Mathematical Model of a Batch Acetone-Butanol Fermentation
J. Votruba, B. Volesky, and L. Yerushalmi 247

Biotechnology Reports

Effect of Chemical Modification on Enzymatic Activities and Stabilities
A. Sadana and J. P. Henley 256

Extraction Chemistry of Fermentation Product Carboxylic Acids
A. S. Kertes and C. J. King 269

Communications to the Editor

Studies on the Flocculation Characteristics of *Kluyveromyces marxianus*
P. Bajpai and A. Margaritis 283

Dilute Acid Hydrolysis of Wheat Straw Hemicellulose at Moderate Temperature: A Simplified Kinetic Model
G. Gonzalez, J. Lopez-Santin, G. Caminal, and C. Sola 288

Functionalized Crosslinked Acrylic Copolymers as Supporters for Biologically Active Proteins
S. Maxim, A. Flondor, A. Carpov, V. Rugina, D. Cojocaru, I. Bontas, and N. Topala 294

Use of Lipid Solvents for Viral Inactivation in Factor VIII Concentrates
G. Mitra and M. Wong 297

Ethanol-Induced Death of *Saccharomyces cerevisiae* at Low and Intermediate Growth Temperatures
I. Sá-Correia and N. van Uden 301

March 1986

The Relationship Between Hydrogen Gas and Butanol Production by *Clostridium saccharoperbutylacetoniocum*
J. D. Brosseau, J.-Y. Yan, and K. V. Lo 305

Some Consideration on Plasmid Number in a Proliferating Cell
J. Koizumi and S. Aiba 311

A Multispecies Biofilm Model
O. Wanner and W. Gujer 314

A Radial Flow Hollow Fiber Bioreactor for the Large-Scale Culture of Mammalian Cells
J. P. Tharakan and P. C. Chau 329

Formation of Propylene Oxide by *Nocardia corallina* Immobilized in Liquid Paraffin
O. Miyawaki, L. B. Wingard, Jr., J. S. Brackin, and R. S. Silver 343

Properties and Quality Characteristics of Crystalline Insulin Extracted by Ultrasound
J. F. Zayas 349

The Effect of Growth Rate Delays in Substrate-Inhibited Kinetics on the Optimal Profile of Fed-Batch Reactors
K. Y. San and G. Stephanopoulos 356

A Measuring System for Biotechnical Processes Based on Discrete Methods of Estimation
J. Staniškis and R. Simutis 362

Evaluation of Startup and Operation of Four Anaerobic Processes Treating a Synthetic Meat Waste
T. Stephenson and J. N. Lester 372

Heat and Microbial Treatments for Nutritional Upgrading of Wheat Straw
O. Milstein, Y. Vered, A. Sharma, J. Gressel, and H. M. Flowers 381

The Kinetics of Protein Precipitation by Different Reagents
M. Y. Y. Chan, M. Hoare, and P. Dunnill 387

Study of Lignin Biotransformation by *Aspergillus fumigatus* and White-Rot Fungi Using ^{14}C-Labeled and Unlabeled Kraft Lignins
K. L. Kadam and S. W. Drew 394

A Computer Model for the Growth and Differentiation of a Fungal Colony on Solid Substrate
G. Georgiou and M. L. Shuler 405

Enzymatic Analyses in Organic Solvents
R. Z. Kazandijian, J. S. Dordick, and A. M. Klibanov 417

Membrane Separation of Protein Precipitates: Studies with Cross Flow in Hollow Fibers
N. Devereux and M. Hoare 422

Biotechnology Report

Protein Separation by Potential Barrier Chromatography
E. Ruckenstein and V. Lesins 432

Communications to the Editor

Pressure Drop in a Packed Bed with a Liquid of Variable Viscosity: The Case of Dextrin Hydrolysis by Immobilized Glucoamylase
K. H. Kim and H. N. Chang 452

Immobilization of Hydrogenase in Nylon Gel Containing Electron Mediator and Application to an Artificial Photosystem
Y. Nosaka, A. Kuwabara, T. Kobayashi, and H. Miyama 456

Analysis of Batch Nitrification Using Substrate Inhibition Kinetics
D. J. Castens and A. F. Rozich 461

April 1986

The Adsorption of *Thiobacillus ferrooxidans* on Coal Surfaces
R. M. Bagdigian and A. S. Myerson 467

Alkali-Explosion Pretreatment of Straw and Bagasse for Enzymatic Hydrolysis
V. P. Puri and G. R. Pearce 480

A Novel Method of Determination of the Internal Enzyme Distribution Within Porous Solid Supports and the Deactivation Rate Constant
D. D. Do and M. M. Hossain 486

An Integrated Microprocessor-Based Fermenter Control System
R. D. Merrill and K. Bauer 494

Intensification of Oak Sawdust Enzymatic Hydrolysis by Chemical or Hydrothermal Pretreatment
J. Szczodrak, Z. Ilczuk, J. Rogalski, and A. Leonowicz 504

Studies on the Thermal Inactivation of Immobilized Enzymes
R. Ulbrich, A. Schellenberger, and W. Damerau 511

Acetonobutylic Fermentation: Improvement of Performances by Coupling Continuous Fermentation and Ultrafiltration
E. Ferras, M. Minier, and G. Goma 523

Elimination of Ethanol Inhibition by Perstraction
M. Matsumura and H. Märkl 534

Kinetics of Anaerobic Purification of Industrial Wastewater
W. L. Bolle, J. van Breugel, G. C. van Eybergen, N. W. F. Kossen, and W. van Gils 542

Direct Evidence for a Xylose Metabolic Pathway in *Saccharomyces cerevisiae*
C. A. Batt, S. Carvallo, D. D. Easson, Jr., M. Akedo, and A. J. Sinskey 549

The Inhibition of the Maximum Specific Growth and Fermentation Rate of *Zymomonas mobilis* by Ethanol
I. M. L. Jöbses and J. A. Roels 554

Production of Cellulase Enzymes and Hydrolysis of Steam-Exploded Wood
R. San Martin, H. W. Blanch, C. R. Wilke, and A. J. Sciamanna 564

A Mathematical Model for Cell Separation Technique of Centrifugal Elutriation
J. P. Barford 570

Bubble Coalescence in Air-Sparged Reactors
T. O. Oolman and H. W. Blanch 578

Biotechnology Report

Recent Developments in Hydrogen Management During Anaerobic Biological Wastewater Treatment
S. R. Harper and F. G. Pohland 585

Communications to the Editor

A Simple Device for Leaf Juice Coagulation
C. D. Ghayal and L. K. Tarte 603

Lipid-Enhanced Ethanol Production from Xylose by *Pachysolen tannophilus*
R. F. H. Dekker 605

Immobilization of Trypsin on Alginic Acid–Poly(glycidyl methacrylate) Graft Copolymer
C. Raghuram Reddy, C. Rami Reddy, K. Raghunath, and K. T. Joseph 609

Hexokinase Activity as Marker to Assess Time of Harvest of Foot-and-Mouth Disease Virus in BHK_{21} Cl_{13} Cell Cultures
V. V. S. Suryanarayana, N. Banumathi, and B. U. Rao 613

Vavilin Equation in Kinetic Modeling of Formaldehyde Biodegradation
N. Bonastre, C. de Mas, and C. Solà 616

Immobilized Phenylalanine Hydroxylase Through the SH Groups
S. Koizumi, T. Takeuchi, H. Umezawa, and T. Nagatsu 620

Effect of Pectin on Anaerobic Digestion of Cattle Dung
D. B. Madamwar and B. M. Mithal 624

Ethanol Fermentation of Cassava Starch Pretreated with Alkali
Y. C. Shin, S. Y. Lee, Y. K. Choe, H. S. Kim, and S. M. Byun 627

May 1986

On-Line Adaptive Control of a Fed-Batch Fermentation of *Saccharomyces cerevisiae*
D. Williams, P. Yousefpour, and E. M. H. Wellington 631

Continuous Hybridoma Growth and Monoclonal Antibody Production in Hollow Fiber Reactors–Separators
G. L. Altshuler, D. M. Dziewulski, J. A. Sowek, and G. Belfort 646

Control of Nitrate Concentration in Fermentations of *Corynebacterium glutamicum*
M. M. Kole, B. G. Thompson, D. F. Gerson, and J. Senechal 659

Effects of Periodic Change in Pressure and Dissolved-Oxygen Concentration on the Incubation Characteristics of *Pseudomonas aeruginosa*
H. Kataoka, S. Sato, S. Mukataka, A. Namiki, K. Yoshimura, and J. Takahashi 663

Effect of Dissolved Carbon Dioxide on Penicillin Fermentations: Mycelial Growth and Penicillin Production
C. S. Ho and M. D. Smith 668

Production of Acetic Acid by *Clostridium thermoaceticum* in Batch and Continuous Fermentations
K. Sugaya, D. Tusé, and J. L. Jones 678

Sugar Cane Bagasse as a Possible Source of Fermentable Carbohydrates. II. Optimization of the Xylose Isomerase Reaction for Isomerization of Xylose as well as Sugar Cane Bagasse Hydrolyzate to Xylulose in Laboratory-Scale Units
S. P. Olivier and P. J. du Toit 684

Induction and Elimination of Oscillations in Continuous Cultures of *Saccharomyces cerevisiae*
S. J. Parulekar, G. B. Semones, M. J. Rolf, J. C. Lievense, and H. C. Lim 700

Kinetic Considerations about the Study of Alcoholic Fermentations of Starch Hydrolysate
A. Converti, P. Perego, M. del Borghi, F. Parisi, and G. Ferraiolo 711

Granulation of Biomass in Thermophilic Upflow Anaerobic Sludge Blanket Reactors Treating Acidified Wastewaters
W. M. Wiegant and A. W. A. de Man 718

Electroenzymatic Reactors with Coenzyme Regeneration: A Theoretical Approach
A. Bergel and M. Comtat 728

Effect of Immobilization on the Physical and Kinetic Properties of Soluble and Insoluble Trypsin–Albumin Polymers
M. A. Cohenford, P. F. Santoro, J. C. Urbanowski, and J. A. Dain 736

Communications to the Editor

Theoretical Growth Yield Estimates for Recombinant Cells
N. A. Da Silva and J. E. Bailey 741

Optimization of Enzyme Immobilization on Keratin- or Polyamide-Coated Bead-Shaped Polymeric Matrix
J. Łobarzewski, A. Wójcik, T. Wolski, and J. Fiedurek 747

Particle Size Effects in the Microbiological Leaching of Sulfide Concentrates by *Thiobacillus ferrooxidans*
M. A. Blancarte-Zurita, R. M. R. Branion, and R. W. Lawrence 751

Bubble Entrainment Aeration for High-Foaming Fermentation
Y. J. Yoo and J. Hong 756

Synergistic Effects of Ethanol, Octanoic, and Decanoic Acids on the Kinetics and the Activation Parameters of Thermal Death in *Saccharomyces bayanus*
I. Sá-Correia 761

Elimination of Bicarbonate Interference in the Binding of U(VI) in Mill-Waters to Freeze-dried *Chlorella vulgaris*
B. Greene, M. T. Henzl, J. M. Hosea, and D. W. Darnall 764

June 1986

Morphology of Yeast Cell Wall as Affected by Genetic Manipulation of $\beta(1\rightarrow6)$ Glycosidic Linkage
S. Jamas, C.K. Rha, and A. J. Sinskey 769

Butanol Fermentation Liquor Production and Separation by Reverse Osmosis
A. Garcia III, E. L. Iannotti, and J. L. Fischer 785

Steam-Explosion Pretreatment of Wood: Effect of Chip Size, Acid, Mositure Content and Pressure Drop
H. H. Brownell, E. K. C. Yu, and J. N. Saddler 792

Design of Fluidized-Bed Fermentors
G. F. Andrews and J. Przezdziecki 802

Behaviors of Southern Red Oak Hemicelluloses and Lignin in a Mild Sulfuric Acid Hydrolysis
A. V. Tran and R. P. Chambers 811

Optimization of CSTRs in Series by Dynamic Programming
S. L. Ong 818

Effect of Temperature and pH on Immobilized *Zymomonas mobilis* for Continuous Production of Ethanol
P. K. Bajpai and A. Margaritis 824

Diffusion Coefficients of Glucose and Ethanol in Cell-free and Cell-occupied Calcium Alginate Membranes
B. J. M. Hannoun and G. Stephanopoulos 829

Experimental Design for Parameter Estimation from Batch Culture
Y. J. Yoo, M. Marino-Galarraga, J. Hong, and R. T. Hatch 836

Continuous Production of Thienamycin in Immobilized Cell Systems
E. J. Arcuri, G. Slaff, and R. Greasham 842

Kinetics of Batch Fermentations for Ethanol Production with *Zymomonas mobilis* Growing on Jerusalem Artichoke Juice
E. Favela-Torres, J.-J. Allais, and J. Baratti 850

Ezymatic Production of L-Serine
H.-Y. Hsiao, T. Wei, and K. Campbell 857

Fermentation Kinetics of *Zymomonas mobilis* at High Ethanol Concentrations: Oscillations in Continuous Cultures
I. M. L. Jöbses, G. T. C. Egberts, K. C. A. M. Luyben, and J. A. Roels 868

Synergism of Endoenzyme and Exoenzyme on Hydrolysis of Soluble Cellulose Derivatives
M. Fujii and M. Shimizu 878

Anaerobic Fermentation of *Lactobacillus bulgaricus* and *Streptococcus thermophilus* on 3% Nonfat Dry Milk with Pure and Mixed Culture
M. D. Oner and L. E. Erickson 883

Analysis of Exponential Growth Data for Yoghurt Cultures
M. D. Oner, L. E. Erickson, and S. S. Yang 895

Utilization of Spline Functions for Smoothing Fermentation Data and for Estimation of Specific Rates
M. D. Oner, L. E. Erickson, and S. S. Yang 902

Estimation of the True Growth Yield and Maintenance Coefficient for Yoghurt Cultures
M. D. Oner, L. E. Erickson, and S. S. Yang 919

Growth of *Saccharomyces cerevisiae* Is Controlled by Its Limited Respiratory Capacity: Formulation and Verification of a Hypothesis
B. Sonnleitner and O. Käppeli 927

July 1986

Effect of Microorganisms on Rate of Liquid Extraction of Ethanol from Fermentation Broths
P. G. Crabbe, C. W. Tse, and P. A. Munro 939

Fermentation Kinetics of Spent Sulfite Liquor by *Saccharomyces cerevisiae*
B. F. Safi, D. Rouleau, R. C. Mayer, and M. Desrochers 944

Optimal Control of Substrate Concentrations in Bioreactors with Separated Sensors
M. N. Oğuztöreli, B. Özüm, and D. F. Gerson 952

Breakthrough Behavior of 17.5 mol% Water in Methanol, Ethanol, Isopropanol, and *t*-Butanol Vapors Passed Over Corn Grits
P. R. Bienkowski, A. Barthé, M. Voloch, R. N. Neuman, and M. R. Ladisch .. 960

Effects of Glucose on Phenol Biodegradation by Heterogeneous Populations
A. F. Rozich and R. J. Colvin 965

Vapor Liquid Equilibrium Behavior of Aqueous Ethanol Solution During Vacuum Coupled Simultaneous Saccharification and Fermentation
P. K. Roychoudhury, T. K. Ghose, P. Ghosh, and G. K. Chotani 972

Mechanistic Analysis of Complex Enzyme Deactivations: Influence of Various Parameters on Series-type Inactivations
A. Sadana and J. P. Henley 977

Photosynthesis in Modulated Light: Quantitative Dependence of Photosynthetic Enhancement on Flashing Rate
K. L. Terry 988

Analysis of Unstable Recombinant *Saccharomyces cerevisiae* Population Growth in Selective Medium
F. Srienc, J. L. Campbell, and J. E. Bailey 996

Enzymatic Formation of Propylene Bromohydrin from Propylene by Glucose Oxidase and Lactoperoxidase
K. Kawakami, S. Nagamatsu, M. Ishii, and K. Kusunoki 1007

Detailed Study of Anaerobic Digestion of *Spirulina maxima* Algal Biomass
R. Samson and A. LeDuy 1014

Investigations of Oxygen Transfer into *Penicillium chrysogenum* Pellets by Microprobe Measurements
R. Wittler, H. Baumgartl, D. W. Lübbers, and K. Schügerl 1024

Use of Hexadecyl Fractosil as a Hydrophobic Carrier for Adsorptive Immobilization of Proteins
M. Nemat-Gorgani and K. Karimian 1037

Investigation of Bacterial Growth on Mixed Substrates: Experimental Evaluation of Cybernetic Models
D. S. Kompala, D. Ramkrishna, N. B. Jansen, and G. T. Tsao 1044

Effects of Mixing During Acid Addition on Fractionally Precipitated Protein
R. R. Fisher, C. E. Glatz, and P. A. Murphy 1056

Operation and Pressure Distribution of Immobilized Cell Hollow Fiber Bioreactors
J. P. Tharakan and P. C. Chau 1064

Preparation of L-Aspartic Acid by Means of Immobilized *Alcaligenes metalcaligenes* Cells
V. Vojtíšek, T. Guttmann, M. Bârta, and J. Netrval 1072

INT–Dehydrogenase Test for Activated Sludge Process Control
J. M. Lopez, B. Koopman, and G. Bitton 1080

Measuring Oxygen Diffusion Coefficients with Polarographic Oxygen Electrodes. II. Fermentation Media
C. S. Ho, L.-K. Ju, and C.-T. Ho 1086

Thin-Film Antimony–Antimony-Oxide Enzyme Electrode for Penicillin Determination
M. T. Flanagan and N. J. Carroll 1093

Purification, Characterization, and Synergistic Action of Endoglucanases from *Fusarium lini*
M. Rao, V. Deshpande, and C. Mishra 1100

Mixed Culture Model of Anaerobic Digestion: Application to the Evaluation of Startup Procedures
A. Dalla Torre and G. Stephanopoulos 1106

Communications to the Editor

Lactose Analysis in Dilute Solutions by Gas Chromatography Using Silylation
A. Gianetto, F. Berruti, and A. G. Kempton 1119

Alcoholic Fermentation of Sorghum Without Cooking
P. Thammarutwasik, Y. Koba, and S. Ueda 1122

August 1986

Effect of pH Oscillations on a Competing Mixed Culture
B. H. Davison and G. Stephanopoulos 1127

Simulation Study of Anaerobic Digestion Control
A. Dalla Torre and G. Stephanopoulos 1138

Atypical Kinetics of Immobilized Firefly Luciferase
L. J. Blum and P. R. Coulet 1154

Saccharification of Explosively Dried Corn
G. H. Robertson, E. M. Zaragosa, and A. E. Pavlath 1159

Immobilization of *Acetobacter aceti* on Cellulose Ion Exchangers: Adsorption Isotherms
R. Bar, J. L. Gainer, and D. J. Kirwan 1166

Effect of Organic Solvents on the Activity of Glucoamylase
H. Nagamoto, T. Yasuda, and H. Inoue 1172

Quantification of Bacterial Chemotaxis by Measurement of Model Parameters Using the Capillary Assay
M. Rivero-Hudec and D. A. Lauffenburger 1178

Validity of Quasi-Steady-State and Transfer-Function Representations for Input–Output Relation in a Michaelis–Menten Reaction
N. Sakamoto 1191

Modulation by a High Citrate Concentration of Kinetic Parameters and of Functional Stability of Two Immobilized Thylakoid Systems
B. Thomasset, A. Friboulet, J.-N. Barbotin, and D. Thomas 1200

Mathematical Model of Extractive Fermentation: Application to the Production of Ethanol
R. L. Fournier 1206

Enzyme Immobilization via Monoclonal Antibodies I. Preparation of a Highly Active Immobilized Carboxypeptidase A
B. Solomon, R. Koppel, G. Pines, and E. Katchalski-Katzir 1213

Structures of Steady States of an Enzyme Reaction in a CSTR
K. H. Byeon and I. J. Chung 1222

Periodical Batch Culture of the Immobilized Growing Fungi *Sporotrichum cellulophilum* Producing Cellulase in the Nonwoven Materials
M. Tamada, N. Kasai, M. Kumakura, and I. Kaetsu 1227

Analysis and Simulation of Hollow-Fiber Bioreactor Dynamics
C. Kleinstreuer and S. S. Agarwal 1233

Determination of Reactor Biomass by Acoustic Resonance Densitometry
B. C. Blake-Coleman, D. J. Clarke, M. R. Calder, and S. C. Moody 1241

Characteristics of Lipase-Catalyzed Hydrolysis of Olive Oil in AOT-Isooctane Reversed Micelles
D. Han and J. S. Rhee 1250

Heterogeneous One-Dimensional Model for Fixed Bed Enzyme Reactors
R. Lortie and D. Thomas 1256

Diffusion in κ-Carrageenan Gel Beads
A.-L. Nguyen and J. H. T. Luong 1261

Biohydration of Unsaturated Fatty Acids by a Mixed Culture of Rumen Microorganisms
M. J. Kellens, H. L. Goderis, and P. P. Tobback 1267

Deactivation Theory
J. P. Henley and A. Sadana 1277

Erratum 1286

September 1986

Stabilization of κ-Carrageenan Gel with Polymeric Amines: Use of Immobilized Cells as Biocatalysts at Elevated Temperatures
K. C. Chao, M. M. Haugen, and G. P. Royer 1289

Cultivation of Microorganisms in an Air-Solid Fluidized Bed Fermentor with Agitators
M. Tanaka, A. Kawaide, and R. Matsuno 1294

Measurement of Interfacial Areas in Aerobic Fermentations by Ultrasonic Pulse Transmission
A. A. Stravs, A. Pittet, U. von Stockar, and P. J. Reilly 1302

Mechanized Systems for Media Dispensing, Inoculation, and Replication of Microorganisms
B. Stieglitz and C. P. DeFelice 1310

Continuous Hydrolysis of Tallow with Immobilized Lipase in a Microporous Membrane
F. Taylor, C. C. Panzer, J. C. Craig, Jr., and D. J. O'Brien 1318

Feedback Identification of Continuous Microbial Growth Systems
D. G. O'Neil and G. Lyberatos 1323

Systems Analysis of the Culture Physiology in Acetone–Butanol Fermentation
L. Yerushalmi, B. Volesky, and J. Votruba 1334

Substrate Concentration Control by Dialysis in Fermentations of *Escherichia coli*
B. G. Thompson 1348

Cadmium Accumulation by Immobilized Cells of a *Citrobacter* sp. Using Various Phosphate Donors
L. J. Michel, L. E. Macaskie, and A. C. R. Dean 1358

Synthesis and Regulation of Extracellular β(1-3)Glucanase and Protease by *Cytophaga* sp. in Batch and Continuous Culture
B. A. Andrews and J. A. Asenjo 1366

Reduction of Waste Product Excretion via Nutrient Control: Possible Strategies for Maximizing Product and Cell Yields on Serum in Cultures of Mammalian Cells
M. W. Glacken, R. J. Fleischaker, and A. J. Sinskey 1376

Pilot-Plant Production of Prednisolone Using Calcium Alginate Immobilized *Arthrobacter simplex*
J. Kloosterman IV and M. D. Lilly 1390

General Characteristics of Optimal Feed Rate Profiles for Various Fed-Batch Fermentation Processes
J. M. Modak, H. C. Lim, and Y. J. Tayeb 1396

Computational Algorithms for Optimal Feed Rates for a Class of Fed-Batch Fermentation: Numerical Results for Penicillin and Cell Mass Production
H. C. Lim, Y. J. Tayeb, J. M. Modak, and P. Bonte 1408

Optimal Substrate Feeding Policy for a Fed Batch Fermentation with Substrate and Product Inhibition Kinetics
J. Hong 1421

Coimmobilization of Substrate and Biocatalyst: A Method for Bioconversion of Poorly Soluble Substances in Water Milieu
R. Kaul, P. Aldercreutz, and B. Mattiasson 1432

Communications to the Editor

Kinetic, Inhibition, and Stability Properties of a Commercial β-D-Glucosidase (Cellobiase) Preparation from *Aspergillus niger* and Its Suitability in the Hydrolysis of Lignocellulose
R. F. H. Dekker 1438

Roles of the Specific Growth Rate and the Ethanol Concentration in the Adaptation of *Saccharomyces cerevisiae* to Ethanol
V. Loureiro and N. van Uden 1443

Relationship Between the Volumetric Mass Transfer Coefficient and Gas Holdup in Airlift Fermentors
W. J. McManamey and D. A. J. Wase 1446

Effect of Electron-Beam Irradiation Pretreatment on the Enzymatic Hydrolysis of Softwood
A. W. Khan, J.-P. Labrie, and J. McKeown 1449

October 1986

A Semicontinuous Culture Model that Links Cell Growth to Extracellular Nutrient Concentration
A. V. Quinlan 1455

Comparative Study of the Effect of Ferrocyanide and EDTA on the Production of Ethyl Alcohol from Molasses by *Saccharomyces cerevisiae*
R. A. Oderinde, L. C. Ngoka, and E. K. Adesogan 1462

Growth of Animal Cells on Microbeads. I. *In situ* Estimation of Numbers
S. J. O. Miller, M. Henrotte, and A. O. A. Miller 1466

Rheometry of Fermentation Liquids
Z. Kemblowski and B. Kristiansen 1474

Rate and Yield Relationships in the Production of Xanthan Gum by Batch Fermentations Using Complex and Chemically Defined Growth Media
A. Pinches and L. J. Pallent 1484

Adsorption Equilibrium in Immuno-Affinity Chromatography with Polyclonal and Monoclonal Antibodies
E. Sada, S. Katoh, K. Sukai, M. Tohma, and A. Kondo 1497

Enzymatic Saccharification of Pretreated Rice Straw and Biomass Production
A. Araujo and J. D'Souza 1503

Enzymatic Production of L-Serine with a Feedback Control System for Formaldehyde Addition
H.-Y. Hsiao and T. Wei 1510

A Kinetic Model for Anaerobic Digestion of Biological Sludge
S. G. Pavlostathis and J. M. Gossett 1519

An Immobilized Enzyme Reactor for the Detoxification of Bilirubin
C. Sung, A. Lavin, A. M. Klibanov, and R. Langer 1531

Patterns of Aeration in a Solid Substrate Fermentor through the Study of the Residence Time Distribution (RTD) of a Volatile Tracer
P. Gervais, C. Bazelin, and A. Voilley 1540

Saccharification of Concentrated Brewing Bagasse Slurries with Dilute Sulfuric Acid for Producing Acetone–Butanol by *Clostridium acetobutylicum*
J. Juanbaro and L. Puigjaner 1544

Growth Kinetics of *Dioscorea deltoidea* and *Catharanthus roseus* in Batch Culture
D. Drapeau, H. W. Blanch, and C. R. Wilke 1555

Role of Extracellular Polymer in the Design of Activated Sludge
M. Sheintuch, O. Lev, P. Einav, and E. Rubin 1564

Biotreatment of *s*-Triazine-Containing Wastewater in a Fluidized Bed Reactor
W. Hogrefe, H. Grossenbacher, A. M. Cook, and R. Hütter 1577

Mathematical Model for Internal pH Control in Immobilized Enzyme Particles
J. K. Liou and I. Rousseau 1582

Continuous Cultivation of Recombinant *Escherichia coli*: Existence of an Optimum Dilution Rate for Maximum Plasmid and Gene Product Concentration
J.-H. Seo and J. E. Bailey 1590

Encapsulation of Viable Cells Within Polyacrylate Membranes
H. Gharapetian, N. A. Davies, and A. M. Sun 1595

November 1986

Anaerobic Digestion of High-Strength Cheese Whey Utilizing Semicontinuous Digesters and Chemical Flocculant Addition
J. P. Barford, R. G. Cail, I. J. Callander, and E. J. Floyd 1601

Effect of Nickel on Biological Methane Generation from a Laboratory Poultry Waste Digester
C. M. Williams, J. C. H. Shih, and J. W. Spears 1608

Fabrication of Reusable Enzyme Brushes for Clinical Analyses: Lactate Dehydrogenase Enzyme Brush
K. G. Raghavan and V. Ramakrishnan 1611

Modeling the Liquid Flow in Up-Flow Anaerobic Sludge Blanket Reactors
W. L. Bolle, J. van Breugel, G. C. van Eybergen, N. W. F. Kossen, and R. J. Zoetemeyer 1615

An Integral Dynamic Model for the UASB Reactor
W. L. Bolle, J. van Breugel, G. C. van Eybergen, N. W. F. Kossen, and W. van Gils 1621

Quantitative Method Based on Energy and Mass Balance for Estimating Substrate Transient Accumulation in Activated Sludge During Wastewater Treatment
S. R. Guiot and E. J. Nyns 1637

Deactivation of Free and Stabilized Acid Phosphatase by Urea
L. Gianfreda, G. Marrucci, and G. Greco, Jr. 1647

Substrate Conditions that Influence the Assays Used for Determining the β-Glucosidase Activity of Cellulolytic Microorganisms
C. Breuil, P. Mayers, and J. N. Saddler 1653

Kinetics and Mechanism of Dissimilative Fe(III) Reduction by *Pseudomonas* sp. 200
R. G. Arnold, T. M. Olson, and M. R. Hoffman 1657

Mechanistically Detailed Model of Cellular Metabolism for Glucose-Limited Growth of *Escherichia coli* B/r-A
S. W. Peretti and J. E. Bailey 1672

Phosphorylation of Yeast Protein: Reduction of Ribonucleic Acid and Isolation of Yeast Protein Concentrate
Y.-T. Huang and J. E. Kinsella 1690

Modeling Active Mass in Aerobic Sludge Digestion
R. L. Droste and W. A. Sanchez 1699

Depolymerization of Chondroitin C Sulfate by Immobilized *Proteus vulgaris* Cells
N. Sato, K. Murata, and A. Kimura 1707

Sequential Substrate Utilization and Effectiveness Factor in Fixed Biofilms
R. L. Droste and K. J. Kennedy 1713

Immobilization of Enzyme into Poly(vinyl alcohol) Membrane
K. Imai, T. Shiomi, K. Uchida, and M. Miya 1721

Enhancement of Enzymatic Hydrolysis of Cellulose by Surfactant
H. Ooshima, M. Sakata, and Y. Harano 1727

Simultaneous Utilization of Methanol–Glucose Mixtures by *Hansenula polymorpha* in Chemostat: Influence of Dilution Rate and Mixture Composition on Utilization Pattern
T. Egli, C. Bosshard, and G. Hamer 1735

Coexistence of *S. cerevisiae* and *E. coli* in Chemostat under Substrate Competition and Product Inhibition
B. H. Davison and G. Stephanopoulos 1742

In Situ Determination of Kinetic Parameters for Biofilms: Isolation and Characterization of Oligotrophic Biofilms
B. E. Rittmann, L. Crawford, C. K. Tuck, and E. Namkung 1753

December 1986

Ethanol Production from Starch by a Coimmobilized Mixed Culture System of *Aspergillus awamori* and *Zymomonas mobilis*
H. Tanaka, H. Kurosawa, and H. Murakami 1761

Anaerobic Calorimetry of *Zymomonas mobils* Using a Heat-Flux Sensor
R. W. Silman 1769

Regeneration of NAD Cofactor by Photosensitized Electron Transfer in an Immobilized Alcohol Dehydrogenase System
M. Julliard, J. Le Petit, and P. Ritz 1774

The Application of a Novel Heat Flux Calorimeter for Studying Growth of *Escherichia coli* W in Aerobic Batch Culture
I. W. Marison and U. von Stockar 1780

Coimmobilization of Malate Dehydrogenase and Formate Dehydrogenase in Polyethyleneglycol (#4000) diacrylate Gel by Droplet Gel-Entrapping Method
S. Kajiwara and H. Maeda 1794

A Model for Filterability of Activated Sludge Supported by Mixed-Liquor Biochemical Data
R. A. Novak 1801

A Method for Estimating the Rejection Coefficient-Molecular Weight Relationship of Ultrafiltration Membrane for a Chain Polymer by Using Gel Permeation Chromatography
S. Adachi, K. Hashimoto, M. Komoto, and H. Tobita 1809

Effects of Hydroxyurea on Immobilized and Suspended Yeast Fermentation Rates and Cell Cycle Operation
P. M. Doran and J. E. Bailey 1814

Mode of Action and Properties of Xylanase and β-Xylodisase from *Neurospora crassa*
V. Deshpande, A. Lachke, C. Mishra, S. Keskar and M. Rao 1832

Production of Penicillin in a Fluidized-Bed Bioreactor Using a Carrier-Supported Mycelial Growth
J. H. Kim, D. K. Oh, S. K. Park, Y. H. Park, and D. A. Wallis 1838

Flow and Oxygen Transfer in a Plunging Water Jet System Using Inclined Short Nozzles and Performance Characteristics of Its System in Aerobic Treatment of Wastewater
A. Ohkawa, D. Kusabiraki, Y. Shiokawa, N. Sakai, and M. Fujii 1845

Pretreatment of Wheat Straw for Fermentation to Methane
A. G. Hashimoto 1857

Enhancement of Growth and Ferrous Iron Oxidation Rates of *T. ferrooxidans* by Electrochemical Reduction of Ferric Iron
S. B. Yunker and J. M. Radovich 1867

Communications to the Editor

Properties of Cellulase Immobilized on Agarose Gel with Spacer
P. Chim-anage, Y. Kashiwagi, Y. Magae, T. Ohta, and T. Sasaki 1876

Cellular Volume Determination of Fungus Claviceps purpurea Sclerotic Cells
M. Anzur, B. Torme, M. Sentjurc, and M. Schara 1879

Electrochemical Ion Control in Batch Cultures of Saccharomyces cerevisiae NCYC 1018
B. G. Thompson 1884
